

STEP BY STEP BUYING GUIDE

1. CHOOSE WHAT TYPE OF CURTAIN YOU REQUIRE

REQUIRED USE

CHOOSE THIS

- ✓ Insulation
- ✓ Dust and fumes barrier
- ✓ Noise reduction

- ✓ Durability
- ✓ High volume traffic
- ✓ Insulation
- ✓ Dust and fumes barrier
- ✓ Noise reduction

- ✓ Insulation for Freezers, Cold Rooms & Refrigerated Vehicles
- ✓ Used in temperatures as low as -40c

2. WHAT TRAFFIC WILL BE PASSING THROUGH?

TRAFFIC TYPE

CHOOSE THIS

Low Volume Traffic

- ✓ Pedestrian

Internal Pedestrian Traffic
(Strip: 200w x 2d mm)

High Volume Traffic

- ✓ Pedestrian
- ✓ Trolleys
- ✓ Pump Trucks
- ✓ Forklifts

Internal Pedestrian & Vehicle Traffic
(Strip: 300w x 3d mm)

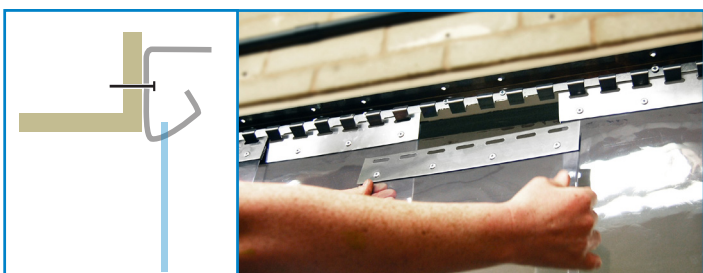

- ✓ External Entrances
- ✓ Pedestrian
- ✓ Trolleys
- ✓ Pump Trucks
- ✓ Forklifts

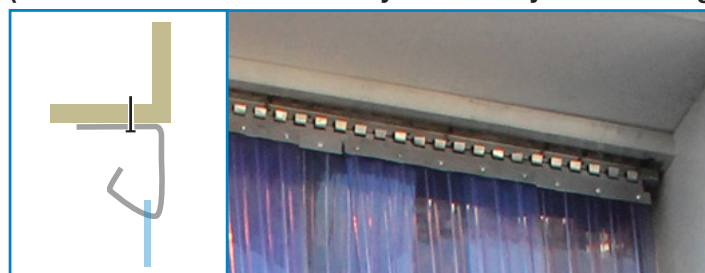

External Traffic
(Strip: 400w x 4d mm)

3. CHOOSE WHAT TYPE OF FIXING YOU REQUIRE

A. Face fixing – fixes to the wall above the opening

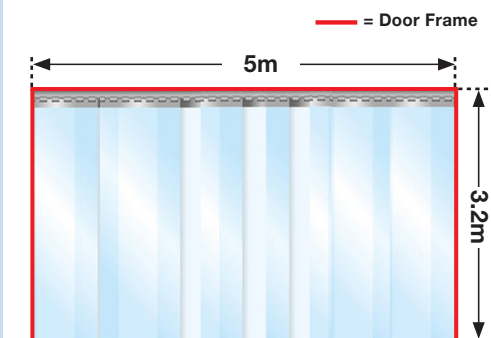

B. Soffit fixing – fixes to the underside of the door frame (used if there is no room above your doorway for face fixing)

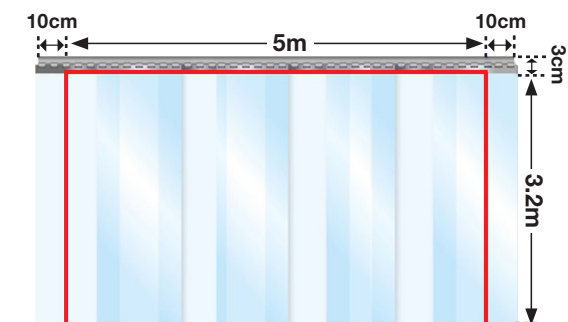

4. MEASURE THE DOORWAY

Soffit Fixing: Measure height and width of your doorway, then multiply the height by the width and round the answer up to the nearest round number

EXAMPLE: $3.2 \times 5 = 16m^2$

Face Fixing: Measure the width of your doorway. Dependant on the traffic type chosen in step 2 add the following measurement to the total width (see table) to ensure insulation of the sides. Then measure the height and add a further 3cm, this allows the hanging bars to be fitted above the door

EXAMPLE: $3.23 \times 5.2 = 16.80$ (ROUND UP TO $17m^2$)

Traffic Type	Add on per side
Internal Pedestrian Traffic	8cm
Internal Pedestrian & Vehicle Traffic	9cm
External Traffic	10cm

5. ORDER THE METER² AMOUNT OF PVC CURTAIN YOU REQUIRE

BiGDUG will then be in touch to iron out the finer details and process your complete order for you

We also sell Red Marker Strip Curtains to highlight the door frame for increased safety awareness. Please speak to our Customer Service Advisors to add this to your order
